Explanation

AWS bills the user on as pay as you go model. AWS will charge the user once the AWS resource is allocated.

Even though the user is not using the resource, AWS will charge if it is in service or allocated.

Thus, it is advised that once the user's work is completed he should:

Terminate the EC2 instance
Delete the EBS volumes
Release the unutilized Elastic IPs
Delete ELB
The AutoScaling launch configuration does not cost the user. Thus, it will not make any difference to the cost whether it is deleted or not.
